

# **THE FUTURE OF GAS TURBINE TECHNOLOGY** 9<sup>TH</sup> INTERNATIONAL GAS TURBINE CONFERENCE

#### 10-11 October 2018, Le Plaza Hotel, Brussels, Belgium

### PRELIMINARY PROGRAMME

The International Gas Turbine Conference is a well-established and renowned biennial conference, organised by ETN, representing the whole gas turbine community. Its objective is to raise the awareness of gas turbine (GT) and turbomachinery technology development needs – from oil & gas, power generation and industrial operators' perspectives – and to explore and exchange ideas with GT experts from the whole value chain attending from all continents. It also provides the opportunity to meet and discuss with policy makers the role of gas turbines in future energy scenarios. The conference will highlight the energy market outlook in Europe and in key markets globally, as well as to present and disseminate current R&D activities and latest achievements for flexible, efficient, reliable and environmentally sound gas turbine technology.

The 9<sup>th</sup> International Gas Turbine Conference (IGTC-18) will focus on the required future GT technology developments from a user's and legislative point of view, with special focus on:

- The role played by gas turbines in the future international energy policy mix, where intermittent sources of renewable energy will significantly increase and nuclear and coal capacity will decrease, while the emerging economies' demand for cheap and secure energy will rapidly rise to assist their economic growth in the coming decades;
- Current and future technology trends and the different stakeholders' views on required technology developments to ensure **flexible**, efficient, reliable and environmentally sound gas turbine operation.

The **keynote sessions and panel discussions** will address critical issues related to climate change mitigation in the energy transition to a low carbon and carbon neutral society. Special attention will be given to increased operational flexibility, fuel flexibility, retaining reliability and lower emissions for both single cycle and combined cycle operation. Energy policies that set boundary conditions and initiatives for GT technology development in Europe and globally will be presented, followed by panel discussions with distinguished experts and high level policy makers.

In parallel **technical sessions**, critical research and development activities necessary for the advancement of GT technology, from operational, environmental and cost perspectives will be addressed. Recent GT technology and new, innovative solutions will be presented. The technical sessions will combine research initiatives, case studies and reports of real case applications, with the aim to give a balanced view of current developments and future needs for research in GT applications.

**Organiser** ETN Tel: +32 (0)2 646 1577

For conference updates and further details, please visit ETN's website: www.etn.global/events/igtc-18/ Conference Management Noora Kilpinen <u>nk@etn.global</u>

> Ilona Kolb ik@etn.global

We very much look forward to welcoming you at the IGTC-18!

## **THE FUTURE OF GAS TURBINE TECHNOLOGY** 9<sup>TH</sup> INTERNATIONAL GAS TURBINE CONFERENCE

#### 10-11 October 2018, Le Plaza Hotel, Brussels, Belgium

### DAY 1 – 10 October 2018 Registration will take place in the lobby of Le Plaza Hotel 07:15 Welcome note: Key points from the 2016 Conference and Introduction to IGTC-18 08:15 Christer Björkqvist, Managing Director, ETN Bernard Quoix, ETN President/Senior Fellow and Head of Rotating Machinery Department, Total 08:30 Keynote session 1: "Energy transition to a global low carbon society" Chair: Christer Björkqvist, Managing Director, ETN **Speakers:** Mechthild Wörsdörfer, Director for Renewables, Research and Innovation, Energy Efficiency, . DG Energy, European Commission Nils A. Røkke, Executive Vice President Sustainability, SINTEF Laszlo Varro, Chief Economist, International Energy Agency (invited) Panel discussion with the above speakers will take place after the presentations. Moderator: Junior Isles, Editor-in-chief, The Energy Industry Times 10:20 **Coffee break** 10:50 Keynote session 2: "Operational needs in current and future scenarios" Chair: Robert C. Steele, Program Manager, EPRI **Speakers:** Nicola Rossi, Head of Innovation Global Thermal Generation, Enel • Shell (speaker to be confirmed) Shaun West, Lecturer Service and Product Innovation, Lucerne School of Engineering and Architecture **Panel discussion** with the above speakers will take place after the presentations. Moderator: Andy Williams, Senior Fellow, Chromalloy 12:45 Lunch

14:00	Operations & Maintenance	Next Generation Technologies	Next Generation Technologies	
	<ol> <li>2. The effect of air filtration on gas turbine performance degradation - ISO16890 and its application to real engine data Ansaldo Energia and Freudenberg Filtration Technologies</li> <li>5. A digitalized approach for combining diagnostic capabilities and maintenance risk-based insights to improve machine operation BHGE</li> <li>75. ORAP®: The Foundation for Predictive Analytics</li> </ol>	<ul> <li>6. Hybrid Gas Turbine (GT) mech drive from Baker Hughes, a GE company BHGE</li> <li>11. Fast Start and Cycling HRSGs: Siemens DrumPlus™ technology Siemens Heat Transfer Technology B.V.</li> <li>21. Towards Highly-Flexible Carbon- Clean Power Production using Gas Turbines: Exhaust Gas Recirculation and cycle Humidification University of Mons, University of Stavanger, Université Libre de</li> </ul>	<ul> <li>45. Digitalization and its role in the Oil and Gas and Power Generation industries GE Power and DNV-GL</li> <li>68. An Advanced Early Fault Detection Tool for Predictive Maintenance of a Fleet of Industrial Gas Turbines Aramis, Politecnico di Milano and Fondation EDF, Ecole Central Supelec</li> <li>To be confirmed (paper under review)</li> </ul>	
	Strategic Power System (SPS) International	Bruxelles and Vrije Universiteit Brussel		
15:30	Coffee break	1		
16:00	Operations & Maintenance	Next Generation Technologies	Next Generation Technologies	
	<ul> <li>19. Performance Analysis of a Twin-Shaft Gas Turbine during Failure in the Variable Stator Guide Vanes System of the Axial Compressor University of Lincoln and Siemens Industrial Turbomachinery</li> <li>61. The challenge of burning Diesel Oil in Aero-derivative Gas Turbines Off-Shore TOTAL</li> <li>52. Extending the Life of F-Class Gas Turbine Rotors for Improved Operational &amp; Maintenance Life Cycle Costs PSM, Ansaldo Energia Group</li> </ul>	<ul> <li>25. Distributed Integrated Solar Combined Cycle Power Plants: Despatchable, reliable, affordable, low carbon electricity Siemens</li> <li>To be confirmed (paper under review)</li> <li>74. Status of the 10 MWe Supercritical Transformational Electric Power (STEP) Program Gas Technology Institute</li> </ul>	<ul> <li>49. Using Data Analytics for Smarter Operation of a Gas Transmission Network DNV-GL and National Grid Gas</li> <li>69. An innovative fleet condition monitoring concept for a 2MW gas turbine B&amp;B-AGEMA and OPRA Turbines</li> <li>To be confirmed (paper under review)</li> </ul>	
18:15	<image/> <text><image/><image/></text>			

DAY 2 – 11 October 2018						
08:00	Networking coffee					
08:30	Opening and introduction					
08:40	<ul> <li>Keynote session 3: "National and regional gas turbine markets: opportunities and challenges" Chair: John Oakey, Professor of Energy Technology, Cranfield University</li> <li>Speakers: <ul> <li>The US gas turbine market and current R&amp;D program and projects, Richard A. Dennis, Technology Manager, US Department of Energy</li> <li>Chinese energy policy and market forecast Ronnie Tian, Founder, NexTurbine</li> </ul> </li> </ul>					
09:40	<ul> <li>Keynote session 4: "Ways to optimise and reduce cost of operations" Chair: Bernard Quoix, ETN President/Senior Fellow and Head of Rotating Machinery Department, Total</li> <li>Speakers: <ul> <li>Thorbjörn Fors, CEO Distributed Generation and O&amp;G Services, Siemens</li> <li>Maria Sferruzza, President LNG &amp; Global Services - Turbomachinery &amp; Process Solutions, BHGE</li> <li>Mark Keith, Vice President TBI, Solar Turbines (invited)</li> <li>Sven-Hendrik Wiers, Vice President Gas Turbines, MAN Energy Solutions</li> </ul> </li> <li>Panel discussion with the above speakers will take place after the presentations. Moderator: To be confirmed</li> </ul>					
10:45	Coffee break					
11:15	Manufacturing & Repair         3. Development of life predictive methods on NovaLTTM16 combustor with simplified physics based models         BHGE         22. Hot Section Life Management Through Improved Material Property Recovery         Electric Power Research Institute and TEServices         47. Industrialization and Current Field Experience of Additively Manufactured Gas Turbine Components Siemens         60. Internally Cooled & Lightweight Radial Turbine Wheels for Gas Turbines HiETA Technologies	New Component Developments 42. Ammonia Gas Turbines (AGT): Review Cardiff University To be confirmed (paper under review) To be confirmed (paper under review) To be confirmed (paper under review)	Next Generation Technologies57. Towards Flexible Co-Generation: Techno-economic Optimization of Advanced Combined Cycle Combined Heat and Power Plants Integrated with Heat Pumps and Thermal Energy Storage KTH Royal Institute of Technology and EPS Europe Power Solutions54. Integration of Heat Pump and Gas Turbine Combined Cycle: Layout and market opportunity University of Genoa and IREN56. High Temperature Heat Pump – A novel Approach to increase Flexibility and Efficiency of CCGT and CHP Power Plants Mitsubishi Hitachi Power Systems Europe59. Intelligent predictive control of a PUMP-HEAT Combined Cycle: introduction and first results Siemens PLM and University of Genoa			
13:15	Lunch	1				

14:20	Keynote session 5: "Technology developments for a low carbon society"					
	<ul> <li>Panellists: <ul> <li>Junichiro Masada, Deputy Head of Turbomachinery HQ, MHPS</li> <li>Peter Flohr, GT Engineering Executive, GE Power</li> <li>Barbara Stanley, VP, Power Generation &amp; Strategic Growth, Solar Turbines</li> <li>Sven-Hendrik Wiers, Vice President Gas Turbines, MAN Energy Solutions</li> <li>Mauro Moretto, Head of Technology Development, Ansaldo Energia</li> <li>Siemens (speaker to be confirmed)</li> </ul> </li> <li>Panel discussion and Q&amp;A: with the above speakers. Moderator: Gary Lock, Senior Business Manager, Frazer-Nash Consultancy</li> </ul>					
16:15	Closing remarks Bernard Quoix, ETN President/Senior Fellow and Head of Rotating Machinery Department, Total					
16:30	End of Conference Networking Coffee and Drinks					
	G	old Sponsor				
Solar Turbines A Caterpillar Company						
Silver Sponsor						
	CULLUM	Frence Exhibitors	MANN+ HUMMEL
